Abortion Care

We offer At Home Abortion Pills (Telemedicine)

In response to the current Covid 19 pandemic, the government has approved the use of telemedicine for abortion care: for medical abortion up to 10 weeks.

This means that if you meet safety criteria to allow for medical abortion without a scan, the abortion medications can either be collected by you from a centre or posted to your home address after your consultation. Our Centres are also open and can arrange a face to face appointment if you need one.

Call the advice line on 0300 456 2217 to find out more information and discuss your options.

Visit [Mariestopes.org.uk](https://www.mariestopes.org.uk) to find information about your choices.
No, judgement, No pressure. Just care, confidentiality and respect.
